

Just Goodbye

I know you're there
But no one can tell
Oh what a mess I am
Too much for my shoulders to bear
But you're still hanging on

You came too soon this time
I cannot hold you yet
Follow the path
Follow the light
Somehow this is just goodbye

It's time to go now
The timing wasn't right for you to come to life
The world wasn't ready yet

The dream was gone
before it began
Oh what a waste it is
I feel like rain
You were the sun
That never got to shine

You came too soon this time
I cannot hold you yet
Follow the path
Follow the light
Somehow this is just goodbye

It's time to go now
The timing wasn't right for you to come to life
The world wasn't ready yet

You came too soon this time
I cannot hold you yet
Follow the path
Follow the light
Somehow this is just goodbye

It's time to go now
The timing wasn't right for us to come to life
The world wasn't ready yet
You came too soon
The world wasn't ready yet
